

■ MedSumm

AI-Powered Medical Report Summarizer for India

■ <https://medsumm-kp.lovable.app>

■ User Flow — Step by Step

1

Step 1: Upload a Report

Take a **Photo** of the report · Upload a **PDF** from lab/hospital · Record a **Voice Note** in Hindi or English

2

Step 2: AI Processes the Upload

OCR extracts text from images/PDFs · **Whisper** transcribes voice · **GPT-4** identifies medicines, allergies, symptoms, test results & critical values

3

Step 3: Color-Coded Summary Generated

■ **RED** — Allergies & Critical alerts | ■ **YELLOW** — Current medications & symptoms | ■ **GREEN** — Past history & test results

4

Step 4: Share with Your Doctor

One-tap **WhatsApp** share · **Print** for clinic visit · **Email** directly to doctor

■ Color-Coded Summary Legend

■ **RED**

Allergies & Critical

Anything dangerous or life-threatening — STOP and check first

■ **YELLOW**

Current Medications & Symptoms

Active treatments and current complaints — Current status

■ **GREEN**

Past History & Test Results

Normal findings and historical background information

■ Key Features

■ Upload Any Report

Works with photos of handwritten or printed reports, PDFs from labs, and Indian language voice notes.

■ AI Extraction

No manual data entry. Extracts even from messy or low-quality images and automatically flags critical values.

■ Share Instantly

Doctor receives a digital copy on WhatsApp. No need to print or carry physical reports anywhere.

■■■■■ Family Access

Add children or relatives as caregivers. Perfect for elderly patients. They can upload reports and view summaries.

■■ ABHA Ready

Connect your Ayushman Bharat Digital Mission ID — part of India's national health infrastructure.

■ Data Privacy

Secure cloud storage. Only you and added family members can see your data. Permanent deletion available anytime.
